

Employers Resource Prescription Discount Card

The Employers Resource Prescription Discount Card is for individuals without prescription coverage through their medical plan. This card provides an easy way to help you and your family with all of your prescription drug needs. Employers Resource participants and their families can obtain average savings of up to 65% on drug prices through our nationwide network of over 50,000 pharmacies, including major chains and community pharmacies. Your actual savings may vary depending on the medication and the pharmacy you use. If you have a medical plan prescription program you generally should use that program instead of this discount card.

To Use at Participating Pharmacies:

- Take your prescription to a participating pharmacy. All brand name and generic drugs are allowed.
- One card automatically covers all family members at no cost.
- Show your Prescription Discount card to your pharmacist every time you fill your prescription. Use your Prescription Discount card for any prescriptions that are not covered by your insurance or excluded from Medicare Part D.
- Discounts are given at the time of purchase. Pay the entire cost of the drug, once the discount is applied. There is no need to submit your receipts. You will receive instant savings or the pharmacy's lowest price when you present your Prescription Discount card.

To Enroll in the Mail Order Pharmacy:

- Call Customer Service at 1-888-479-2000, press prompt #5.
- One of our Representatives will be happy to enroll you in our convenient mail order program.
- We guarantee quality assurance using our 7-point test on every prescription before mailing.
- Standard shipping is free.

See our list of Pharmacies, save more and enjoy the convenience of home delivery on your medications by visiting www.wellcard.com.

Non-prescription, medical equipment and over the counter products are not included in this program. BP is not an insurance plan or entity that covers prescription drug costs or arranges for prescription services. Prescriptions may be filled at any pharmacy; however, the BP program provides a discount only at a participating pharmacy.

 Wal-Mart Pharmacy
 Winn Dixie Pharmacy

Frequently Asked Questions

Q: Is this savings program insurance or an insurance type program?

A: No, it is a discount program.

Q: Is there a monthly fee or a registration fee for this program?

A: No.

Q: How soon can I use my card to start saving money?

A: Your savings card is available for use immediately.

Q: Are all of my family members covered?

A: Yes. Your identification card is valid for everyone in your family, even if they live in another location.

Q: Can this program help me if I am covered by an insurance program?

A: If you have insurance, you should always use it first. However, this program can save you money when purchasing medications not covered by your insurance, such as formulary exclusions or limitations. A common example would be Cialis, which may not be covered by your plan. You can also use this program to save money on medication purchases if you exceed your annual prescription benefit limits.

Q: I don't have insurance, and have a very sick family member who is taking a lot of expensive medications. Am I eligible for this program?

A: Yes, this program has no exclusions or limitations based on need or medical condition.

Q: Is my information kept private?

A: Your data is confidential and maintained on a secure server. It is never used for any purpose other than direct administration of your prescription savings program. No personally identifiable medical or pharmaceutical information is available to anyone not directly involved in program administration.

Q: Do I need to present my ID card each time I buy a prescription?

A: No. If you use the same pharmacy chain, you can tell your pharmacist to fill all future prescriptions using this ID card. He will store the information in his computer system and you will not need to show your ID card. In the event that you change pharmacies, you will need to present your card the first time you purchase a prescription, but not thereafter.

Q: Can I go to any pharmacy?

A: No, you need to go to a participating WellDyneRx pharmacy. A list of participating pharmacies can be found on our website at www.wellcard.com.

Q: Tell me more about the pricing.

A: Final pricing may vary depending on your quantity, pharmacy and geographic location. Please remember that medication pricing can be somewhat complicated especially for certain powder and liquid medications. The price you pay may vary since pricing is sometimes based on metric units, rather than complete bottles or packages. Your purchase, nevertheless, will be under our national contract and you will receive a savings from normal retail pricing.

Q: How much will I save by using this program?

A: As with all consumer products, medication prices can vary among pharmacies. There is no standard price for any particular medication among pharmacies since they set their own prices for drugs. Because of this, no specific savings can be calculated. Savings amounts will vary somewhat depending on what the pharmacy wishes to charge for medications. In general, depending on the actual medications purchased, savings can range from 13% to 65%.

Present this card and your prescription to any participating pharmacy. Discounts are given at the time of purchase. At the time of purchase, you are responsible for paying the entire cost of the drug, once discount is applied.
